8.2 Continuity Check ........................................................................................................................................1
8.2 Continuity Check

Replace [R32] with the following:

[D43.5] A MEP located at a leaf in an E-Tree service SHOULD NOT report an alarm for a MEP at a remote leaf in the same MEG.\(^6\)

\(^6\) One way to help accomplish this is by adding all MEPs to the dot1agCfmMaMepListTable, but only setting dot1agCfmMepDbRMepIsActive for root MEPs. For both MIB objects, see Table 17-11 of IEEE 802.1Q [3].
